The bezel on these displays has been redesigned to eliminate the potential risk of the FPC being scratched if tightly wrapped around the bottom edge of the display.

The changes described above should not have any impact on the part's electrical or mechanical compatibility within your system. All our testing has found the new version to be compatible with existing platforms driving the old display. We fully expect the new displays to fit and function without any issue for our customers.

The new displays will be labeled with a different revision control number on the back of the display. See example below.
